A. Sample Citation and Introduction to Citing Journal Articles in Audiovisual Formats

The general format for a reference to an article from a journal published as an audiovisual, including punctuation:

- on videocassette:

Nakada SY, Moon TD, Wolf JS Jr. Hand-assisted laparoscopic renal surgery. Videourol Times [videocassette]. 1998;11(2):[presentation 1, 12 min.]. 1 videocassette: sound, color, 1/2 in.

Examples of Citations to Journal Articles in Audiovisual Formats

Journal articles in audiovisual formats are usually found in videocassette or audiocassette form. With the advent of CD-ROM and the Internet, many of these titles either ceased publication or migrated to the newer formats, but a few continue to be published and older articles continue to be cited.

Cite articles in audiovisual format using the standard format for journal articles (see Chapter 1), but add the type of medium, i.e., [videocassette] or [audiocassette], after the title to alert the user that special equipment is needed to view the article.

Videocassettes and audiocassettes do not use page numbers, so citations to journal articles in these formats require the addition of information on their placement within the cassette. Some publishers provide wording such as article 2 or segment 3, but if no wording is found, use "presentation." Citations to articles on audiocassette also require an indication of which side of the cassette contains the article being cited. See Location in the next section for further details.

Provide the extent or length of an article in terms of the run time, since page numbers are not present. Run time (also known as running-time) is the length of the film or program in minutes, such as 140 min. Further details of the physical description may also be provided to give additional information such as size, which can affect the equipment needed to view the item. See Physical Description (O) in the next section for details.

This chapter covers journal articles that are published as audiovisuals. See Chapter 19 for journals published in CD-ROM, DVD, or disk, and Chapter 23 for journals on the Internet. Because examples of journal articles published on videocassette or audiocassette are few in number compared to journal articles in print format, see also Chapter 1A Journals Articles for additional examples of specific parts of a citation.

The chief source for information about an audiovisual is the opening screens. If more information is needed, consult the case housing the audiovisual or any accompanying booklet or documentation.
Note that citations to journal articles published in videocassette or audiocassette format are not in PubMed.

**Citation Rules with Examples for Journal Articles in Audiovisual Formats**

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

**Author for Journal Articles in Audiovisual Formats (required)**

**General Rules for Author**

- List names in the order they appear on the opening screens or text, the carrying case, or in accompanying documentation
- Enter surname (family or last name) first for each author
- Capitalize surnames and enter spaces within surnames as they appear in the document cited on the assumption that the author approved the form used. For example: Van Der Horn or van der Horn; De Wolf or de Wolf or DeWolf.
- Convert given (first) names and middle names to initials, for a maximum of two initials following each surname
- Give all authors, regardless of the number
- Separate author names from each other by a comma and a space

  Sergio Lopez Moreno *becomes* Lopez Moreno S
  
  Jaime Mier y Teran *becomes* Mier y Teran J

  [If you cannot determine from the article whether a surname is a compound one or a combination of a middle name and a surname, look to the table of contents of the issue or an annual or other index for clarification. For example, Elizabeth Scott Parker may be interpreted to be Parker ES or Scott Parker E.]

- Some bibliographies and online databases show a place of publication after a journal title, such as Emerg Med (Glendale, Calif). This practice is used to show that two or more journal titles with the same name reside in a library collection or database; the name of the city where the journal is published distinguishes the titles. The city or state/country is usually shown in abbreviated format following the same rules as for words in journal titles, as Calif for California in the example above. If you use a bibliography or database to verify your reference and a place name is included, you may keep it if you wish.

Box 26. Options for journal titles.

The following forms are not NLM practice for citing journal titles, but are acceptable options:

• Periods may be placed after each abbreviated word in the title

  Video J Orthop [videocassette]. may become Video. J. Orthop. [videocassette].

• The title may be written out in full

  Video Journal of Orthopaedics [videocassette].
Box 27. Abbreviation rules for editions.

- Use the same rules for abbreviating the words in an edition statement as for the words in journal titles, because an edition is considered a part of the title in journal citations.

- Abbreviate and capitalize all significant words and omit the other words, such as articles, conjunctions, and prepositions. For example: of, the, at, in, and, L’. See Appendix A for a list of commonly abbreviated English words in journal titles. See Appendix B for other sources.

- Omit any punctuation found.

- Separate the edition from the title by a space and place it in parentheses.

- Do not follow abbreviated words with a period, but end all the title information with a period.

  Example:
  
  First Image. OB/GYN Edition becomes First Image (OB GYN Ed) [videocassette].

      - Appendix B for non-NLM sources
  - Ignore diacritics, accents, and special characters in words. This rule ignores some conventions used in non-English languages to simplify rules for English-language publications.

      - Å treated as A
      - Ø treated as O

Do not follow abbreviated words with a period, but end all journal title information with a period.

- Do not abbreviate any of the words or omit any words
- Use the capitalization system of the particular language
- Ignore diacritics, accents, and special characters in words. Treat letters marked with a diacritic or accent as if they are not marked. This rule ignores some conventions used in non-English languages to simplify rules for English-language publications.

- Language for describing physical characteristics

Box 45. Language for describing physical characteristics.

When a journal volume or issue is published on videocassette or audiocassette, follow the location with information on the physical characteristics of the cassette. Physical description is optional in a reference, but it may be included to provide useful information. For example, the size of an audiovisual indicates what equipment is needed to view it. Note that the words used in description are taken from ISO 832:1994 - Rules for the abbreviation of bibliographic terms and reflect standard library practice. See Appendix C for a list of commonly used English words and their abbreviations.

- Describe videocassettes using terms for the number of cassettes, whether or not it has sound or is silent, is filmed in color or black and white, and its size in inches

- Describe audiocassettes in terms of the number of inches per second (ips). The standard audiocassette is 2 in. x 4 in. and 1 7/8 ips. While audiocassettes are produced in a number of sizes, the standard size is used for scientific journals. Thus

Box 45 continues on next page...
size is usually omitted from description of audiocassettes unless it deviates from the standard.

- Follow the number and type of cassette with a colon and a space. Separate other types of information by commas. End with a period.

*Typical words used to describe videocassettes include:*

- sound
- silent
- color
- black & white
- color with black & white
- 1/2 in. (standard videocassette size)

2. 1 videocassette: sound, color with black & white, 1/2 in.
3. 2 videocassettes: sound, color, 1/2 in.
4. 1 videocassette: silent, black & white, 3/4 in.

*Typical words used to describe audiocassettes include:*

- 1 7/8 ips. (standard audiocassette speed)
- 15/16 ips. (standard speed for microcassettes)

*Examples of complete physical description statements for audiocassettes:*

1. 1 audiocassette: 1 7/8 ips.

B. Sample Citation and Introduction to Citing Journal Titles in Audiovisual Formats

Reference to an entire journal may be made in a reference list. The general format for a reference to a journal title in audiovisual format, including punctuation:

- for a title continuing to be published:
Examples of Citations to Journal Titles in Audiovisual Formats

If a journal is still being published, as shown in the first example, follow volume and date information with a hyphen and three spaces. If a journal has ceased publication, as in example two, separate the beginning and ending volume and date information with a hyphen with a space on either side. Because examples of journal titles published on videocassette or audiocassette are few in number compared to journal titles in print format, see also Chapter 1C Entire Journal Titles for additional examples of the specific parts of a citation.

Journal titles in audiovisual format are usually found in videocassette or audiocassette form. With the advent of CD-ROM and the Internet, many of these titles either ceased to exist or migrated to the newer formats, but a few continue to be published and older titles continue to be cited. Cite titles in audiovisual format using the standard format for print journal titles (see Chapter 1C), but because special equipment is needed to view these materials, add the appropriate type of medium, i.e., [videocassette] or [audiocassette], after the title.

The physical description of an audiovisual is optional in a reference but may be included to provide useful information. For example, a journal on videocassette may be provided in either 1/2 in. or 3/4 in. formats, and different equipment is needed to view them. Other
information that also may be provided in the physical description is whether or not the journal is displayed in color or black and white, or has sound. See Physical Description in the next section for details.

Journals frequently change titles and publishers over time. When citing a journal, always provide information on the latest title and publisher unless you are citing an earlier version. If you wish to cite all volumes for a journal that has changed title, provide a separate citation for each title. For example:

It is not correct to cite this title as:

Authoritative information on a journal in an audiovisual format, in order of preference, may be found on: (1) the opening screens or wording, (2) the case containing the audiovisual, and (3) any accompanying printed material.

Note that the rules for creating references to journal titles are not the same as the rules for cataloging them. Therefore records found in the NLM LocatorPlus and the NLM Catalog databases will not always agree with the instructions presented here.
