DISCRIMINATION PROHIBITED—Under the provisions of applicable public laws enacted by Congress since 1964, no person in the United States shall, on the grounds of race, color, national origin, handicap, or age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity (or, on the basis of sex, with respect to any educational program or activity) receiving Federal financial assistance. In addition, Executive Order 11141 prohibits discrimination on the basis of age by contractors and subcontractors in the performance of Federal contracts, and Executive Order 11246 states that no federally funded contractor may discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. Therefore, the National Institute of Environmental Health Sciences must be operated in compliance with these laws and Executive Orders.
A Decade of Improving Health Through Multidisciplinary Research

February 24 - 26, 1997
Chapel Hill, North Carolina

Environmental exposures to hazardous waste have the potential to pose a serious threat to human health and nature. The Superfund Hazardous Substances Basic Research and Training Program was established in 1986 to address these concerns. This multidisciplinary Program, now completing its tenth year, is sponsoring a research conference to highlight its scientific accomplishments. Participants will include researchers from the various scientific disciplines involved in hazardous substance research. Individuals from universities, federal, state, and local agencies and the general public are invited to attend.

Topics:
- Exposure
- Biological Effects
- Risk Assessment
- Site Characterization
- Remediation
- Outreach

Contact:
Claudia Thompson

A National Institute of Environmental Health Sciences/
U.S. Environmental Protection Agency Program
International Conference on
Water Pollution and Health
May 22-23, 1997    Chicago, Illinois

Sponsored by the National Association of Physicians for the Environment (NAPE)
Co-sponsored by the National Institute of Environmental Health Sciences (NIEHS)

Intended as a comprehensive look at the worldwide problems of water pollution and its resulting effects on human and animal health, this conference will consider information concerning water pollution (toxics and pathogens), water treatment, water quality management, successes and failures in dealing with the effects of pollution, and interventions necessary to assure safe drinking water reserves and environmentally healthy bodies of water for the future.

A primary goal of this conference is to organize a diverse groups of professionals (medical and healthcare, water treatment, public health, and environmental) involved in water quality issues in order to facilitate their working together in the future. Particularly important will be the increased involvement of the physician and healthcare professional community in these issues, especially as to pollution prevention efforts. Theme: “Pollution Prevention is Disease Prevention.”

A variety of subjects will be discussed, including but not limited to:
- Waterborne Infectious Disease Organisms and Effects on the Human Body
- Toxics in Water and Effects on the Human Body
- Report on the Global Decline in Microbiological Safety of Water
- The Milwaukee Cryptosporidium Outbreak: Lessons Learned
- Physicians and Healthcare Organizations’ Possible Roles re Water Pollution and Health
- Overview of the Water System in the U.S. by Water Treatment Professionals
- International Aspects of Water Pollution
- Water Pollution and Biodiversity Protection

The day before the Conference, from 2:30 - 5:30 p.m., a tour of Chicago’s water treatment facility will be available to all registrants.

The day after the conference, the International Society of Doctors for the Environment (ISDE) will hold its annual meeting (over 50 countries now have such societies).

For information contact:
Betty Farley
Conference Coordinator
National Association of Physicians for the Environment (NAPE)
6410 Rockledge Drive, Suite 412
Phone: 301-571-9790    Fax: 301-530-8910    E-Mail: nape@ix.netcom.com

Oregon State University invites nominations and applications for the position of Director of the Environmental Health Sciences (EHS) Center. Funded by a NIEHS Center grant of approximately $1.5 million annually, this 30-year-old Center is internationally recognized for its expertise and its related high quality research programs. The EHS Center is a national resource for multidisciplinary approaches to problems in human environmental health. The director will hold a 1.00 FTE 12-month appointment (0.75 FTE as director, 0.25 FTE in an academic department) with a 9-month tenure commitment at the rank of professor within an academic department and college that is appropriate to the individual's background.

We are looking for a well-established scientist to provide scientific and administrative leadership for the EHS Center within the policies of the NIEHS and Oregon State University. A distinguished record of scholarly accomplishment and leadership is required for continued program development and EHS Center support. A doctorate degree is required and the director is expected to maintain a highly recognized research program in a human health-related area that complements the mission of the EHS Center and the NIEHS. Successful teaching experience is required.

Nominations should include name and address of the nominee and a letter addressing the qualifications of the individual. Applicants should submit a letter of interest and a resumé along with names, addresses, phone numbers, and e-mail address of four references to:

**Dr. Max Deinzer**  
Chair, Search Committee  
Environmental Health Sciences Center  
Oregon State University  
1011 ALS Building  
Corvallis, OR 97331-7302  
e-mail: deinzerm@ccmail.orst.edu

References will not be contacted without prior approval of the applicant.

Nominations are due February 1, 1997.  
For full consideration, apply by March 1, 1997; position shall remain open until filled.  
Position is available July 1, 1997.

Cardiovascular Health: 
Coming Together for the 21st Century—
A National Conference

February 19–21, 1998
Hyatt Regency Embarcadero
San Francisco, California

"Challenges, Solutions, and Skills for the Next Millennium"

Conference Highlights

- **CLINICAL MANAGEMENT**... Tomorrow’s findings from today’s clinical trials, new clinical practice guidelines, and risk factor management beyond 2000

- **HEALTH CARE DELIVERY**... Managed care trends, economics, and quality

- **HEALTH COMMUNICATIONS**... Innovation in reaching special populations, patients, and health professionals

- **PREVENTION**... What works now and what may stand the test of time

- **RESEARCH**... New frontiers in epidemiology, diagnosis, behavioral science, treatment, and prevention

International Symposium on Waterborne Cryptosporidium

March 2–5, 1997
Newport Beach, California

Cryptosporidium is a significant concern to the water industry. Industry professionals, along with public health experts, have been focusing their research efforts in many areas including source water protection, water treatment processes, detection methods, risk assessment, health effects and treatment, and communications. This symposium will provide a forum for the exchange of information on the most recent Cryptosporidium research occurring worldwide. In addition, the symposium will provide direction for identifying future research needs.

Technical Program
The symposium will consist of 3 days of papers on a variety of subject areas related to waterborne Cryptosporidium, including, but not limited to:

- Sources/Occurrence
- Disinfection effectiveness
- Surveillance/epidemiology
- Source protection
- Detection methods
- Regulatory framework
- Risk assessment
- Communications
- Treatment approaches
- Lessons learned
- Research needs

The Department of Surgery and The Howard C. Naffziger Surgical Society
University of California School of Medicine at San Francisco

Present

The Postgraduate Course in General Surgery
April 24–26, 1997

Ritz-Carlton Hotel on Nob Hill
San Francisco, California

Clinically oriented, this program offers general surgeons an intensive overview of problems encountered in daily practice. Distinguished guest faculty will join UCSF's own surgical faculty to present the most practical and current review of current issues in General Surgery.

1997 Major Topics Include:

- Issues and Challenges in General Surgery
- Minimally Invasive Surgery
- Progress in Laparoscopic Surgery
- Anorectal Surgery
- Hepatobiliary-Pancreatic Surgery
- Gastrointestinal Tract Surgery
- Breast Care Update
- Trauma
- Pre-and Post-Operative Care

Special Guest Faculty:

- Jeffrey H. Peters, MD
  University of Southern California, Los Angeles, California

- Lee E. Smith, MD
  Washington Hospital Center, Washington, DC

- Michael Trede, MD
  University of Heidelberg, Heidelberg, Germany

For further information, please write the Office of Continuing Medical Education, Room MCB-630, University of California School of Medicine, San Francisco, California 94143-0742, or call: (415) 476-4251; fax: (415) 476-0318, e-mail: inquire@ocme.ucsf.edu, Internet: http://cme.ucsf.edu
The 42nd Institute in Water Pollution Control

Leo Engineering Building
Manhattan College
June 1997

Two courses will be offered

Modeling of Transport, Fate, and Bioaccumulation of Toxic Substances
June 2–June 6, 1997

Treatment of Municipal, Hazardous, and Toxic Wastewaters
June 2–June 6, 1997

Tuition for each course is $1,200.00, which includes a set of notes for each attendee. Preregistration for enrollment is required.

Who should attend?
These continuing engineering programs are designed for practicing engineers and scientists in industry, consulting engineering, research organizations, academic institutions, and city, state, and federal agencies.

Why should you attend?
These week-long courses will provide important information and updates in the rapidly changing field of water pollution control for young engineers and seasoned professionals. The courses are set in a classroom atmosphere to promote dialogue between participants and lecturer.
