NOTICE TO AUTHORS

As a result of fiscal and administrative reorganization, we are now able to decrease the page charge for publication in the Proceedings. Effective July 1990, the page charge (formerly $75 per page) will be $50 per page until further notice.

Igor B. Dawid
Chairman
Editorial Board
CONDENSED INFORMATION FOR CONTRIBUTORS

(See the first issue of the year for the complete Information for Contributors)

The PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES USA publishes articles describing original work in the sciences that are of interest to a wide audience. Only members or foreign associates of the Academy may submit papers, which are accepted on condition that they have not been published and are not submitted elsewhere. Research papers may not exceed five printed pages. Review articles and papers presented at Academy symposia may be published upon invitation from the Editorial Board.

Submission of Manuscripts. A member may submit up to six manuscripts in any calendar year. For their own papers, members are requested to provide assurance that the manuscript has been reviewed by a knowledgeable colleague who is not a coauthor. A nonmember must submit his/her manuscript to a member who will obtain (at least) two reviews; the member should select the reviewers and they should remain anonymous to the author. In deciding whether to accept a manuscript for publication, the member may overrule a negative review, but the reason(s) why must be explained explicitly on submission of the paper to the PROCEEDINGS office. To ensure that the communicating member is effective in the role of adjudicating differences of opinion between authors and reviewers, it is essential that he/she be expert in the field of the paper, and this must be certified on the transmittal form. The signed reviews, authors' replies, and members' conclusions (where applicable) must accompany the submission. The Editorial Board reserves the right to subject papers to additional review and to make the final decision on acceptance. For further details, consult the complete Information for Contributors [87 (1), pp. iii–x].

The following general conditions apply. (i) Papers reporting experiments involving human subjects or materials must include authorizing documents issued by the appropriate officials from the institution where the work has been done. (ii) Submission of reports involving recombinant DNA assumes that National Institutes of Health guidelines, or equivalent guidelines in the respective country, have been adhered to. The Editorial Board may request proof to substantiate this assumption. (iii) Publication in the PROCEEDINGS implies that materials employed in the work such as cloned DNAs, antibodies, bacterial, animal, or plant cells, viruses, and computer programs will be made available to all qualified investigators. The Editorial Board considers submission of an article to represent a firm commitment to this principle.

Nucleic acid sequences should be submitted to the GenBank data base. Instructions will be sent to authors of appropriate papers or may be obtained in advance from GenBank.

Manuscript Preparation. Adherence to the length limit of five printed pages and the format specifications given below is mandatory. Failure to comply with either will result in delay of publication. Three complete copies of the manuscript are required. Two copies should include original art suitable for reproduction and xerographic copies of the art for identification. A PROCEEDINGS classification is necessary and up to five key terms that do not repeat terms in the title may be included. Standard abbreviations, which need not be defined, are listed in the complete Information for Contributors; nonstandard abbreviations must be defined on first use in both abstract and text and also should be grouped in a footnote. Only published work and papers in press may be cited in the reference list. Personal communications and citations of in press work of others must be accompanied by an authorizing letter. Authors' suggestions for figure reductions will be considered but the final decision will be made by the PROCEEDINGS staff, taking lettering size into account.

Financial Obligations. A page charge (currently $50 per page, and subject to change) is levied to help defray publication costs. In addition, authors of papers containing color art are expected to pay a surcharge (currently $1500 minimum) to cover the added cost of such art. The author assuming the obligation to arrange for payment of these charges should be identified on the manuscript. If an author avoids this responsibility, the liability shifts to the sponsor.

Manuscripts should be sent to PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES USA, 2101 Constitution Avenue, Washington, DC 20418 (U.S. Postal Service) or 2139 Wisconsin Avenue, N.W., 2nd floor, Washington, DC 20007 (express and courier services); telephone (202) 334-2525.

Grounded in the past, facing the future ...

- Seventy-five years of unequaled distinction is the basis for continued growth for the Proceedings.

- If future research is as exciting as that of the past, the Proceedings is indeed essential reading.
