S8 Fig.  Circadian expression pattern of GmCOLs in soybean cultivars Kenfeng 16 and Hefeng 43. Leaves: U, unifoliolate; T1, the 1st trifoliolate; T2, the 2nd trifoliolate; T3, the 3rd trifoliolate stage. U, U-stage; T1, T1-stage; T2, T2-stage; T3, T3-stage; T4, T4-stage. The detailed information of stages and sampling were shown in the Materials and Methods section. Relative expression levels (REL) were analyzed by qRT-PCR and normalized to UKN1. Averages and standard errors are the result of three replicates.
