S1 Fig. Individual ferret pharmacokinetic data used for model development.

For additional details (e.g., doses that ferrets received), see S1 Table.

**Study 1:** Ferrets with IDs beginning with TA were infected with H5N1, TB with H3N2 and TC were infected with H5N1, except for ferrets TC-004, TC-005 and TC-008, which were uninfected.
Study 2: Ferrets 1-6 were uninfected and ferrets 7-24 were infected with influenza B virus.
Study 3: Ferrets were uninfected.
