THE

HAMBLIN POLYSCOPE

A multi-purpose instrument, for:
Binocular indirect Ophthalmoscopy,
Visualizing Confined Operating Fields,
E.N.T. Examination, etc.

This narrow-angle illuminated binocular loupe features:
Brilliant illumination, Minimal Heat;
Adjustable illumination; Variable P.D.

Comfortable in Wear;
Light in Weight.
For a quick, easy and accurate VISUAL FIELD testing

PERIMETER
OF DOCTEUR ETIENNE

- BOWL made of transparent plastic. White screen painted on the inside; meridians and parallels engraved on the outside. Illumination uniform and adjustable.

- Ever-clear TEST OBJECT projected from the outside, the position of which is easy to mark.

- During the testing, the limits of the visual field are designed straight on the bowl. After examination, they are recorded on special tracing paper CHARTS. Scotomas can be recorded apart. directly traced on the bowl, with the accuracy of a CAMPIMETER.

For superficial eye infections

An eye ointment with a rapid and intense antibacterial action, 'Brolene' is indicated for use, either alone or in conjunction with Propamidine Ophthalmic Solution, in blepharitis, acute and chronic conjunctivitis and corneal ulceration caused by a variety of organisms, and for the prevention and treatment of infection in superficial traumatic eye lesions. It is active against many staphylococci resistant to penicillin and other antibiotics, and its use is much less prone than that of these agents to promote the emergence of resistant strains of organisms. 'Brolene' is active in the presence of blood, pus, and lachrymal secretion, is well-tolerated, readily absorbed on mucous surfaces and unlikely to cause sensitization reactions.

Presentation:
'BROLENE' IS SUPPLIED IN 5 GRAMME TUBES.
Further information is available on request.

Hearing Spectacles

Truly accurate dispensing can now be achieved in this field. Hamblin Hearing Spectacles overcome the difficulties often experienced with such devices by a design which dissociates the acoustic and optical aspects of the problem.

A miniature transistor hearing aid produced by specialist manufacturers, is incorporated in a Hamblin hand-made spectacle frame. Thus, the requirements of both ophthalmologist and aurist may be independently met.

THE MAJOR SYNOPTOPHORE

UNIVERSAL AND STANDARD MODELS

The new Major Synoptophore, which supersedes the popular Moorfields Synoptophore and the Lyle Major Amblyoscope, was designed with the co-operation of several leading Surgeons and Orthoptists. Two models of this fine instrument are available — the Universal Model as illustrated, and the Standard Model which has all the features listed at right, with the exception of the last.

Both Models can be supplied immediately.

*P.D. scale on Orthoptist's side
*Higher chin rest movement
*Large breathshield
*Sloping handles for tiny children
*Direct reading Ductions Scale
*Unbreakable perspex opals
*Easy, Positive Ductions Locks
*Cyclophoria Scale engraved IN and EX
*Transformer inside base
*Lifting handles on the base
*Provision for After Image Test and/or Automatic Flashing (on Universal Model only, as illustrated)

CLEMENT CLARKE

INSTRUMENT DEPARTMENT 63 WIGMORE STREET LONDON W.1
GOLDMANN APLANATION TONOMETER

The APLANATION TONOMETER, manufactured by HAAG-STREIT, is the result of several years of intensive study of tonometry in Professor Goldmann’s clinic at Berne. The instrument is used in conjunction with the Goldmann Slit-lamp as is shown in the illustration. We have imported the first Aplanation Tonometer into this country and are now in a position to invite enquiries.

* OTHER HAAG-STREIT APPARATUS which can be supplied from Stock includes the Slit Lamp, Projection Perimeter, Ophthalmometer and Adaptometer. Servicing facilities (on site or at our Works) are available for all Haag-Streit instruments.

CLEMENT CLARKE

xxix
ALL-ELECTRIC TEST TYPE

The All-Electric Test Type is of a completely new design and by using internal illumination it is considerably lighter in weight than earlier models. A standard area type is used. The motor is silent. The control unit may be fixed at any distance from the type on wall or desk. The opal plastic types are easily interchangeable.

*The standard model is cream with a black base. All-black models can be supplied on request.*

XXX
A NEW TRIAL CASE

S.A.2.B.

Price
£43 - 5 - 0

This new Trial Case is smaller than our well-known Major range of Trial Cases, but is ideally suited for consulting room or travelling.

The lenses are standard 38 mm. with a lens aperture of 20 mm. diameter surfaced Plano convex or concave to give the maximum degree of correction during testing. The rims are made from solid aluminium and anodised Black for concave lenses and either Satin Silver or Red for convex powers.

The well-made panelled case can be supplied in Oak or Mahogany and has a lift-off lid, fixed tray and a large space for Trial Frames, Cross Cylinders, etc. Outside measurements 20" x 12" x 24".

CONTENTS
23 Pairs each of Plus & Minus Spheres
0.25 to 3.00 in steps of 0.25D.
3.50 to 5.00 in steps of 0.50D.
6.00 to 8.00 in steps of 1.00D.
12.00 to 16.00 in steps of 2.00D.

16 Pairs each of Plus & Minus Cylinders
0.25 to 3.50 in steps of 0.25D.
4.00 to 5.00 in steps of 1.00D.

IMPORTANT NOTICE

OPHTHALMOSCOPE BATTERIES

Manufacturers of the dry cells used in Hamblin Ophthalmoscopes have recently altered their design. The new style may short-circuit against the stop-ring in the upper end of the earlier type Lister-Morton handles.

To remedy this, the diameter of the hole in the stop-ring on all Hamblin Ophthalmoscopes now being manufactured has been increased from 7/8 of an inch to 1 and 1/16.

When existing ophthalmoscopes are received for routine overhaul, the stop-ring will accordingly be altered without extra charge.
The illustration (exact size) is of an extra-conjunctival implant devised by Mr. M. L. Nairac, D.O.M.S., and described by him in the British Journal of Ophthalmology, March 1957.

It is claimed that in 26 cases fitted with these implants during a period of 4 years, none has been extruded. British Journal of Ophthalmology (1957) 41, 182.

15, WIGMORE STREET, LONDON, W.1.
Makers of spectacles of a fine precision and of a standard worthy of the best work of British craftsmen—a very important but fast dwindling section of the optical industry.

Frames are made and mounted to the individual measurements of each patient and both frame and lenses periodically checked during the course of production.

The finished spectacles are finally checked by a qualified dispensing optician and whenever possible, personally fitted on every patient.

Specify Isophane
and be sure of superior lens quality

Vertex corrected, hard polished and best form, Isophane lenses are the finest media for interpreting prescriptions ascertained by modern refraction techniques; they reduce spherical aberration and oblique astigmatism to a minimum. Providing the best possible marginal correction Isophane lenses are available in single vision, bifocal and trifocal forms.

**Isophane**

**SINGLE VISION LENSES**
Unsurpassed for quality, accuracy, and maximum correction. The finest ophthalmic lens your clients can wear. Supplied with certificate of quality.

**Isophane**

**FULVUE BIFOCALS**
Distinguished by the curved segment top and ease with which all wearers take to them without difficulty. Unique segments with angled top reduces irritating glare to the wearer. Wide angle corrected curves for distance.

**Isophane**

**TRIFOCALS**
7 mm. intermediate for wide field of vision; jumpless reading segment; corrected distance curves; the most modern trifocal; perfect for general use in cases of presbyopia of 1.75 D and over.

*Other B.A.O. lenses include: WATFORD single vision and bifocals, CROMWELL Trifocals, CRUXITE tinted lenses, etc.*

LADY ON HOLIDAY

Our model is not wearing spectacles. If it were necessary she would undoubtedly be attracted by a Spiller frame made to suit her features, her dress style and her purse. Such a frame might be the Spiller "High Noon", so entirely suited to carefree holiday mood. It is strongly fashioned in two-tone laminated plastic. Designed for wear with normal lenses "High Noon" is admirably suited for glazing with protective sun lenses.
